

## HAPPY NEW YEAR 2023 for all of us at RST-SANEXAS!

We all make New Year's Resolutions with good intentions of keeping them but most of the time we fail and go back to our old ways. In fact, statistics show, that after 1 week 75% are still successful in keeping it. After two weeks, the number drops to 71%. After 1 month, the number drops again to 64%. And after 6 months, 46% of people who make a resolution are still successful in keeping it.

For your patients who are suffering with acute or chronic pain, circulation problems, or muscular rehabilitation issues, their resolutions to reduce their suffering and get back to living an active pain-free life never changes, day to day, month to month, or year to year! Using advanced quantum-based technology for treating your patients with RST-SANEXAS neoGEN® Electric cell-Signaling Technology (EcST) and even Electric Signal Intonation (ESI based on quarter-tone musical scale), the device targets and transcutaneously delivers electric signal energy waves along with resonant harmonics frequency hopping programs in a safe, non-invasive, effective, and comfortable treatment for your patients. Treating your patients using RST-SANEXAS neoGEN® for pain management, circulation, and rehabilitation conditions can be very rewarding not only for your patients but for YOU too when you see how much you have improved their health and well-being giving them HOPE!

Our Commitment to YOU...

1. Provide you with optimal treatment protocols and clinical response to optimize patient response.
2. Thoroughly train you and your staff on Electric cell Signaling Treatment (EcST) procedures and patient application techniques.
3. Provide research and technical expertise available to elevate your clinical expertise in EcST and other patient effective integrative therapies.

**Happy New Year 2023!**

*Take care and thank you for all that you do!*

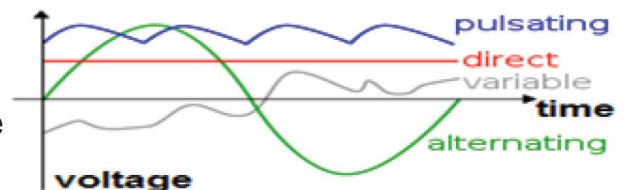

## IMPROVE PATIENT CARE with ELECTRIC cell-SIGNALING TECHNOLOGY (EcST)

Chronic pain affects millions of people globally. As medical professionals, you need to find a treatment option that effectively improves your patient's health by reducing the use of pharmaceuticals and providing safe and effective relief through pain management, increased circulation, and improved rehabilitation. Learning how to apply energy techniques for treating your patients is a rewarding undertaking. Our goal at RST-SANEXAS is to help increase your awareness and understanding of the science of electricity and how EcST plays an important role in improving your patient's medical outcomes.

RST-SANEXAS neoGEN®-Series provides an energy approach by delivering quantum-based Electric cell-Signaling (EcST) therapeutic energy waves to the source of the pain. The neoGEN® device achieves this with a patented AC biphasic polarity-balanced sine wave produced in an ultra-high digital frequency generator (UHdfg) and spreads much higher electrical frequency (both AM & FM) levels making it almost impossible for the peripheral or central nervous system to accommodate or ignore. By using specific time-varying electric energy signals, associated harmonics, and resonance frequencies, the neoGEN® device creates different physiological and therapeutic effects for your patient's treatment.

**Direct Current (DC)** is electrical current which flows consistently in one direction.

**Alternating Current (AC)** is electrical current, in which the direction of the flow of electrons switches back and forth at regular intervals or cycles.

**Spread-Spectrum Frequency Hopping Oscilloscope Tracing**

The above is an example of what our energy waves may look like during a treatment program.

### The neoGEN® devices utilize:

- AC Current (Tesla's Law)
- Interferential Current
- TENS Current
- Powered Muscle Stimulation
- Spread Spectrum Frequency Hopping
- Frequency (FM) & Amplitude (AM) Modulation
- Chaotic Signaling (Random & sequential frequency sweeping)
- Electric Cell Signaling
- Electromagnetic Field (Faraday's Law)
- Electronic Signal Intonation (Harmonic Resonance – Quarter tone musical scale movement)
- Fibonacci Scale Equations
- Schumann Resonance according to universal law
- Quantum Physics
- Solfeggio Frequency

### Reason to use RST-SANEXAS neoGEN® device in treating your patients:

1. Adjunctive treatment of post-traumatic pain syndromes
2. Management and symptomatic relief of long-term intractable pain
3. Management of post-surgical pain problems
4. Relaxation of muscle spasms
5. Prevention or retardation of disuse atrophy
6. Increase blood circulation
7. Muscle reeducation
8. Maintaining or increasing range of motion
9. Post-surgical stimulation of calf muscle to prevent phlebothrombosis

**YOUR PATIENTS WILL THANK YOU!**

## ENERGIZE THE NEW YEAR 2023

with **25% OFF!!** (the 3 products below)

Ends January 31, 2023

### **RST-SANEXAS VasoHealth**

Give your body a natural **BOOST** of nitric oxide

- Increases Circulation
- Improves Heart Function
- Strengthens Immune System
- Increases Energy
- Supports Healthy Blood Pressure
- Increase Sexual Health
- Provides Antioxidant Support
- Fights Infectious Disease

### **RST-SANEXAS CBD Analgesic Balm**

A fast-acting, long-lasting treatment afterglow

Premium topical balm with patented, polarized CBD, Arnica, turmeric and essential oils for pain relief and post-treatment “afterglow”. The balm is THC free, easily absorbed, and fast acting.

### **RST-SANEXAS Analgesic Spray**

Convenient spray to get to those hard-to-reach places

Specialized spray-type formula for pain relief and post-treatment “afterglow”, which is easily absorbed and fast acting.
